

## Technical Project Manager

At Avegant, we are a unique team. Heads-down when we need to be, we enjoy each other's company and play together as well as work together. Each member of our team contributes in their own way to our culture of openness, collaboration, and creativity.

Avegant is seeking a Technical Project Manager to manage our customer projects and manufacturing ramp-up in our continued development of our cutting-edge near eye display technology. The position will be best filled by a highly-motivated person with at least 2 years of experience in managing technical project scopes and schedules, preferably in a design and production environment, or equivalent experience. This position will be responsible for managing multiple project timelines, ensuring deadlines are met and sufficient resources are deployed in the development and evaluation of new optical technologies, architectures, components, and assembly concepts for near-eye display systems. This is a great opportunity to be a part of a revolutionary technology in a fast-growing field. This position will work closely with our mechanical engineering, optical and industrial design teams. This position reports to the Chief Technology Officer.

Competitive salary based on experience, stock options, full medical, dental, vision benefits, 401k matching, unlimited PTO, office snacks, and team lunches.

The role is an in-office role, at our office located in San Mateo, CA, within walking distance of Caltrain.

### Responsibilities:

- Define project plans and schedules
- Manage and track project schedules
- Assess project risk
- Identify and prioritize project tasks
- Drive suppliers, integrate their deliverables and schedules into projects
- Communicate status and the big picture to the project team and management
- Understand and extract action plans from complex technical discussions and translate into succinct messaging for status reporting
- Support the team in moving projects forward and helping the team innovate for creative and technical excellence
- International travel to manufacturing facilities and suppliers

### Qualifications:

- Total of 5 years high-tech engineering experience with at least 2-3 years of project management experience with consumer electronic products, ideally optics-related
- BS in engineering or other technical field, or equivalent experience
- Willingness to try new solutions and share challenges and roadblocks

A V E G A N T

- A “how can I help” mindset
- Curiosity, humility
- Strong proficiency with project management software and tools/techniques such as MS Project, EVM, etc.
- Experience in setting up project schedules and work breakdown structures for mass production of consumer electronics, including direct work with contract manufacturers
- Efficient collaboration with team members to achieve project goals, and contribute positively to the engineering community environment.
- Comfortable with fast paced schedule driven development
- Strong technical background - ability to understand technical design, trade offs; debate merits of a solution with architects and engineering leads.
- Strong written and oral communication skills
- PMP certification or training a plus
- Fluency in Mandarin a plus

Avegant is a well-funded, venture-backed technology company developing next-generation display technology to enable previously impossible augmented reality experiences. We are pioneering innovative hardware and software solutions that will forever change how we learn, play, work and interact with each other. We’ve won multiple awards, our team is best in class, and we’re just getting started.

Avegant is about the journey of innovation, together as a team. Interested in joining us? Send a pdf of your resume to [jobs@avegant.com](mailto:jobs@avegant.com).
